

The only gin with true Lakes provenance.

Nose: Zesty orange citrus, coriander and cassia bark followed by hints of earl grey tea and cracked black pepper.

Palate: Herbal and complex with vibrant notes of juniper, spice and coriander, leading to a peppery finish.

Finish: Long and aromatic

A diverse blend of 15 carefully selected botanicals, including Cumbrian juniper, and four others which are native to the Lake District National Park.

Process

Our handmade copper pot still is charged with the finest English wheat spirit and our pure Cumbrian water, sourced from the River Derwent. The botanicals are carefully measured into the still and steeped overnight to extract the essential oils. The following day the steam is gently introduced and a long slow single batch distillation commences.

Enjoy

Drink as you please. We recommend a slice of pink grapefruit to highlight certain nuances of our uber complex gin.
