

The gin is produced in a two stage process, the first being vapour infusion using our 500 litre pot still with a botanical basket. Once distilled, this base gin is compounded with additional delicate botanicals to add more flavour and colour.

Our Citrus Gin is a new style gin with added elements of zest, herbs and spices combining a hint of Italian lemons and Spanish grapefruit with a suggestion of kaffir lime leaves and star anise. This gin was very much designed as our cocktail or long-mixing gin. The added botanicals give it a flavour profile that allows you to be creative with the introduction of bold flavours to your drinks.

Each of our gins is truly hand-crafted and small batch with each batch producing only 280 bottles. Our gins are distilled with passion, crafted with skill and bottled with pride.
