

ADNAM'S

SOUTHWOLD

Adnams

Building on its impeccable 700-year heritage as an independent brewer, 2010 saw Adnams become the first English brewery to produce premium spirits 'from grain to glass'.

Adnams' spirits are produced in small batches in the Copper House Still on the site of the original Adnams brewery, using grain grown and malted locally in East Anglia.

This grain is brewed into a 'distillery wash' 7% ABV beer with the help of Adnams' own two-strain yeast. This unique brew is then fed into the still and forms the base of each spirit.

Adnams' Copper House Gin won Best Gin in the World trophy at the International Wine & Spirit Competition 2013, while its Longshore Vodka picked up the same level of recognition by claiming the Best Vodka title in 2014.
